Seeking a 6-month end-of-studies internship from April 2027 – distributed systems, cloud & backend

EDUCATION

Institut Polytechnique de Paris – Télécom SudParis 2026 – 2027
M2 Parallel and Distributed Systems (PDS) – track FODQ Palaiseau, France
- **Courses**: HPC (OpenMP, MPI, CUDA, Slurm), multicore programming (lock-free algorithms, NUMA), distributed algorithms

Télécom Paris – Institut Polytechnique de Paris 2025 – 2027
Diplôme d'Ingénieur (MSc in Engineering), double-degree programme with INPT Palaiseau, France
- **Tracks**: Distributed Software Systems (SLR); Maths, Theoretical CS & Operations Research (MITRO)

Institut National des Postes et Télécommunications (INPT) 2023 – 2025
Engineering cycle, Software Engineering – algorithms, cloud computing, software architecture Rabat, Morocco

Lycée Mohamed V – Classes Préparatoires (CPGE) 2021 – 2023
*Physics & Engineering Sciences – ranked **20th** / **912** at the national entrance exam (CNC)* Casablanca, Morocco

EXPERIENCE

CIEMS.ai June 2025 – Sept. 2025
Software Engineering Intern – AI-assisted vehicle damage assessment Rabat, Morocco
- Built the **Flask** REST backend of **CIEMS-AutoVision** for insurers: JWT auth, role-based access control, rate limiting
- Integrated **Gemini** and **GPT** vision models to pre-fill damage reports from vehicle photos
- Developed the **Next.js/React** frontend (claim-to-report workflow, PDF export); turned client interviews into specs

INPT – SEEDS Research Team (CEDoc 2TI) Feb. 2025 – May 2025
Research Intern – Software architecture optimisation Rabat, Morocco
- Designed **HARO**, a multi-objective optimiser proposing microservice decompositions of Java monoliths, ranked by ROI
- Modelled codebases as dependency graphs enriched with **CodeBERT** embeddings and Spring framework-level edge weights; implemented the full Python pipeline
- Benchmarked 20+ methods (Louvain, Leiden, GA, simulated annealing, tabu search, NSGA-II) on 5 open-source Spring systems

Ministry of Health June 2024 – Sept. 2024
Software Engineering Intern – national youth health platform (ages 10–25) Rabat, Morocco
- Developed the "Information & Education for Health" module (Spring Boot, PostgreSQL, Kafka, Docker); ran requirement meetings with stakeholders in Scrum sprints

PROJECTS

Quorum – replicated key-value store on Raft, written from scratch – Go, Docker, Prometheus GitHub Live 2026
- Raft from scratch (PreVote, snapshots) on an fsync'd WAL; 3,000 fault scenarios per CI run, linearizable (Porcupine)
- Durable writes 842 → ∼3,450/s (p50 18.8 → 4.7 ms): pipelining, group commit, connection pooling
- Deployed, leader killed every 10 min: fixed an election storm caused by undetected dead TCP connections

Vigil – fleet telemetry & failure detection – Go, Python, MQTT, Kafka, Prometheus GitHub Live 2026
- MQTT → Go gateway → Kafka for a simulated fleet (backpressure); no loss at 16,000 msg/s in load tests
- Phi-accrual failure detector: stalled machines flagged after ∼1.2 s of silence, crashes in ∼1 s
- 10-second aggregates in TimescaleDB with Kafka offsets in the same transaction: crash-safe (randomized test)

Also: Fault-tolerant key-value store (Java/Akka, ABD quorums, linearizability checker, team of 4) · Distributed robotic factory (Spring Boot, Kafka, livelock-free concurrency)

AWARDS, LEADERSHIP & ACTIVITIES

Highest Kaggle score (30 teams) – HAKS Hackathon (Airbus × IBM), corrosion-risk prediction 2026

2nd place, grand final – ASC Systems Engineering Challenge (IP Paris), system architecture design 2025 – 2026

Vice-President, INPT Chess Club – organised internal tournaments and weekly training sessions 2024 – 2025

Member, English Debating Club, Télécom Paris 2025 – present

SKILLS & LANGUAGES

Programming: Java, Python, Go, C, C++, TypeScript/JavaScript, SQL
Systems & Backend: Spring Boot, Akka, Flask, Node.js, REST, Apache Kafka, Redis, PostgreSQL, MySQL, OpenMP, MPI
DevOps & Cloud: Docker, Git, GitHub Actions, Prometheus, Grafana, Linux
AI & Research: LLM integration (Gemini, GPT), NLP, graph algorithms, multi-objective optimisation
Languages: English – full professional (TOEIC 955/990); French – C1 (DALF C1); Arabic – native
Interests: Chess (1900+ rapid on chess.com), competitive programming, mathematics
